

## CEMENT

### Term Tech Plastic Pipe Cement Clear Solvent (250ml Tub)

The Termination Technology plastic pipe cement is a clear thixotropic gel designed for bonding ABS and UPVC plastics to themselves or each other. The solvent rapidly develops high bond strength, enabling assembled units to be handled and installed very quickly. Allow at least 10 minutes after bonding before further handling and 8 hours after bonding before putting into service.

## Technical Data

### Colour and Material

Material	Thixotropic gel
Colour	Clear

### Application Type, Size and Range

Suitability	Solvent cement for plastic applications
-------------	---

### Product Specification

Specification	Conforms to BS6209
---------------	--------------------

### Quantities and Packaging

Packaging	White tub
Quantity (ml)	250

### Temperature and Fire Information

Flammability	Extremely flammable liquid and vapour
--------------	---------------------------------------
