

GRIP-1.5

Term Tech Catenary Wire Grip Lock Accepts 1.5mmØ Wire

The Termination Technology range of catenary wire and grips are suitable for hanging lighting in high areas with a lower installation time compared to other methods. Self sustaining design with grips that use the weight of the installation to lock the retaining pin on the gripping wheel and hold securely in place. Available in a range of diameters and as a ready to use pack.

Technical Data

Colour and Material

Material	Zinc alloy body, Stainless steel retaining pin, Sintered steel gripping wheel
----------	---

Application Type, Size and Range

Suitability	For use with catenary wire to create self sustaining light supports
-------------	---

Physical Attributes

Style	For use with 1.5mmØ wire
-------	--------------------------

Weight and Load

Max Payload (kg)	10
------------------	----
