

HH10400HIRE

Term Tech Tool Hire of HH10-400 Hydraulic Crimp Tool 2 Day Hire Including Carriage

The Termination Technology range of hire tools include a range of handheld and foot pump operated hydraulic crimp and cutting tools, mechanical cable jacks and cable rollers. Carriage for delivery and collection included in the cost of the initial hire with each additional hire day/week on top once the tool is back with us. Please note on all hires, although the length of hire may be stated on your order, we do still require a phone call or email on the day you wish to end the hire to confirm the off-hire and that the goods are ready for collection. We are able to arrange collection from a site address twice, upon two failed collections we would request the tool is returned to us or your branch for us to collect from there.
