

S392

Term Tech Non-hardening Sealing Compound 30x 100g Sticks (3kg pack)

The Termination Technology non-hardening sealing compound is a single-part permanently soft and flexible sealing/insulating compound for use in a range of applications. Suitable for general purpose sealing and blocking/filling electrical components such as cables, chokes, junction boxes and more. Supplied in 100g sticks with pack sizes of 5 sticks or 30 sticks available.

Technical Data

Colour and Material

Colour	Black
--------	-------

Durability

Chemical Resistance	Oils, detergents, grease, caustic sodas, petrol, alcohol and mild acid resistant
---------------------	--

Physical Attributes

Specific Gravity (g/cm ³)	1.7 - 1.8
Style	Non-sagging putty, soft and easy to mould

Quantities and Packaging

Product Count	30x 100g Sticks
---------------	-----------------

Temperature and Fire Information

Heat Distortion Temperature (°C)	-20 to +85 (ASTM D648-56)
Flammability Testing	No exothermic heat development
