Term Tech Right Angled Copper Tube Terminal 95mm² Cable 12mm Hole (Unit 100)

The Termination Technology range of right angled copper tube terminals is manufactured from seamless copper tube to BS2871/C106. All terminals are provided with an inspection hole to ensure the conductor is fully inserted before crimping. A bell mouth also ensures a smooth transition from lug to cable, thus avoiding the problems of chafing where the component is subject to vibration. Other angles greater or smaller than 90° can be made to order, other specialist terminal ranges are also available.
