

TT95

Term Tech Indent Crimp Tool 10-120mm² Non-Insulated Terminals Hand Operated

The Termination Technology TT95 indent crimp tool is designed for use with aluminium lugs from 10mm² to 120mm². Hand operated with an adjustable jaw to set the tool to the correct size before crimping. Can be used for copper but designed for aluminium as it is a softer metal with a much thicker barrel which prevents the lug from splitting when crushing.
