

UN250

Term Tech Unial Anti-Corrosion Paste (250g Tin)

The Termination Technology unial paste is an anti corrosion inhibiting compound suitable to enhance conductivity between connections. Supplied in a 250g resealable tin for easy use and storage.

Technical Data

Application Type, Size and Range

Suitability Wide range including Copper, Aluminium and Brass connections

Physical Attributes

Style Anti-corrosion inhibiting compound

Quantities and Packaging

Packaging	Metal tin
Quantity (g)	250
